0 SETUP

DAY 1 • 1-2 HRS

OUTCOME: FARM CREATED ON THE RIGHT CHANNEL · UI LEARNED · ZERO KEYS WASTED

- ☐ **Finish Blannid's Third Memoir** (G28). Hard gate — nothing below unlocks without it.
- ☐ **Accept** "An Invitation from the Life Association" (auto-granted).
- ☐ **Go to Tara, Jousting Arena.** NPCs: **Krom** = evaluations/Maistir · **Tyrone** = deliveries · **Folla** = gathering.
- ☐ **Create your farm** via "Taillteann Farming: A New Season."
- ☐ **CHECK YOUR CHANNEL FIRST.** Farm locks to this character + channel until February. No changes.
- ☐ **Learn the Life Guide UI** (Quick Menu). Tabs: Production Status · Deliveries · Life Goals · Collections · Rare Gathering Times · Seasonal Info.
- ☐ **Buy seeds & nutrients** from Blatt on the farm.

BEFORE SPENDING A SINGLE KEY

- ☐ **Read your server's Iria barter list first.** Requirements differ per server, rotate monthly. A top-100 KR trader wasted keys unlocking wrong recipes.
- ☐ **Unlock cauldron recipes only for goods your server demands now.** **Keys are the scarcest resource in the system.**

 OUTCOME: LIFE LEVEL 30 • ALL SIX BASICS LV 5 • KEY INCOME FLOWING

DAILY LOOP • ~25 MIN

Bounty-plant rubber/cobwebs/quartz → Tend on prompt → 12:50 or 8:50 event → 6 processed deliveries (keys) → Cheer x3 → queue rubber on logout

Weekly – BOTH WEEKS, NO SKIPPING

- ☐ All 20 commissions from Folla + Tyrone. Week 1 → ~Lv 21 • Week 2 → Lv 30. Missed weeks are unrecoverable.
- ☐ Talk to Krom after the cap – extra content for capped players.
- ☐ Spread Basic Points evenly across all six Expertises. All six must hit Lv 5 to unlock Specializations – favorites waste nothing but time.

Farm rules

- ☐ Bounty priority: Rubber → Cobwebs → Quartz. Longest timer + one-per-harvest crops gain the most from the 80% cut.
- ☐ Mono-crop before events: fill plots with ONE delivery-target crop. Event boosts all planted crops → mass Fine/Finest of exactly what you need (+30/+70 coins each).
- ☐ Deliver Finest whenever possible. +70 coins per Finest crop over base.
- ☐ Farm Expansion goals first – both Rubber Trees ASAP. Rubber is the season's bottleneck: longest production, most recipe overlap.
- ☐ Don't spend Bounty on jasmine/blackberries during the expansion push – idle plots are fine; feed only goal demands.
- ☐ Life Goals at 2 / 5 / 7 unlock weekly repeat quests – add to Thursdays.

2 SPECIALIZE

WEEKS 2-3 • AUG 20-SEP 3

 OUTCOME: FOOD LV 5 • COOKING SUB-SPEC LV 1+ • MAISTIR APPLICATION SUBMITTED

- ☐ Confirm six Basics at Lv 5 → Specializations open.
- ☐ Scout before committing: count cooking-commission grinders in Tara. Food packed + Medicine empty? Pivot to Medicine – same plan, softer field, 20-slot floor does the work.
- ☐ Spend all 10 cheap evaluations on ONE field (Food). See ladder below – spreading burns your 1-key tier.
- ☐ Food → Lv 5, then Cooking sub-spec → Lv 1+. Cooking Lv 1 is the Fresh Food gate; Fresh Food is required for Seasonal Dishes.
- ☐ Start gathering rare materials – Life Guide → Rare Gathering Times auto-paths you. Sub-spec level = success rate.
- ☐ Apply for Maistir via Krom immediately. Aug 27 and early-Sep windows are the thinnest of the season – most players won't have specs yet.
- ☐ Grind evaluation commissions early – scoring ends midnight before eval Thursday.
- ☐ Rank Harvest Song to R1. Buffs Dan tests AND daily crafting. Dan entry: skill R1 + 100 training pts; fees 10/20/30K.

KEY-COST LADDER — SHARED ACROSS ALL FIELDS

EVALUATION #	1-10	11-20	21-50	51-90	91+
KEYS EACH	1	2	3	5	10

One tree to Lv 5 ≈ cheap tier. Three trees ≈ costly tier. The ladder is the game telling you to focus.

3 INCOME

SEPTEMBER ONWARD

OUTCOME: ~30 MIN/DAY · RANK HELD EVERY CYCLE · FOUR REVENUE STREAMS

REVENUE STREAMS · PRIORITY ORDER

1 Tier-3+ barter (farm output) · 2 Seasonal Dishes weekly · 3 Physique Stew (rebirthers) · 4 Rare material surplus

Daily

- ☐ Run the farm loop — faster now with expanded plots + movement speed.
- ☐ Gather rares on schedule; batch-cook Fresh Food and list it. AH buyers can filter by freshness remaining.

Weekly — THURSDAYS

- ☐ 20 commissions + farm repeat quests.
- ☐ Check Seasonal Info → cook this week's Seasonal Dishes. Combat EXP +20% weeks sell hardest. Maistir-exclusive = your monopoly.
- ☐ Stock Physique-Preserving Stew. Players rebirth weekly — recurring demand forever.
- ☐ Run tier-3+ barter with cauldron goods and Plates (Azurite/Hematite/White Lead).

Biweekly & monthly

- ☐ Re-grind commissions every eval cycle to hold rank. Incumbency beats casuals falling off the treadmill.
- ☐ 1st Thursday: re-read the barter list before unlocking anything new. **Rotation changes demands.**

4 EXPAND

MID-SEASON · OPTIONAL

OUTCOME: SECOND INCOME LINE · TREASURE-CHEST LOTTERY · SURPLUS CONVERTED BEFORE RESET

- ☐ 15 Life Goals done → Treasure Chests spawn while harvesting. 1 key each, pay **300K–50M gold**. Open only with surplus keys.
- ☐ Second line: Magic Craft → Lv 5 for Ether Powder. No rank needed · feeds all Equipment Tuning · 30-day expiry = repeat buyers. Alt: Farming, to feed your own cooking.
- ☐ Field-hop opportunistically. Dan scores persist — shift commission effort to whichever field is soft that cycle.
- ☐ Season Collections with surplus only (they consume goods) — titles + farm skins.
- ☐ Save your one free full spec reset. Individual resets cost Pon.

EACH PATTERN BELOW BURNED REAL PLAYERS ON THE KOREAN SERVER FIRST

- 1 **Keys before barter list.** The #1 wasted resource. **Fix:** read Iria's list first, every month.
- 2 **Skipped commission weeks.** EXP is capped and unrecoverable. **Fix:** 20/20, every Thursday.
- 3 **Bounty on short-timer crops** during expansion. **Fix:** rubber, cobwebs, quartz only.
- 4 **Eval-morning cramming.** Scoring closed at midnight. **Fix:** finish commissions a day early.
- 5 **Points spread across trees.** Burns the 1-key tier. **Fix:** one field to Lv 5 first.
- 6 **Hoarding into February.** Everything resets; rares become exchange fodder. **Fix:** liquidate by late January.
- 7 **Selling raw crops.** 100 common crops ≈ 300K, sagging with supply. **Fix:** sell processed goods, dishes, barter.
- 8 **Gear bought before need.** **Fix:** check what deliveries/recipes actually consume first.
